In certain instances there have been arrangements made between a physician and the head of a family that a fixed amount should be paid for each day the various members of the family continued in good health. But should ackness enter the household, the physician's usual stepend was discentinued. Such an agreement is founded on common sense, for we don't want to be made well, we want to be kept with. There is a great deal of unnecessary stekness resulting from a want of careful attention to bodily requirements. Keep the blood pure, keep the functional habits of the body regular, counteract the effects of exposure by always having a bottle of Dr. John Buil's Sarsaparilla in the household and using it in anticipation of an attack of illness or when the very first symptoms are manifest. Disease will not trouble you if you will heed this good advice. It is an excellent preventive of disease and decay, as well as assic ourc. Marion Banner.
